24		TOTAL EXPENDITURE	₹ 2,22,20,345	₹ 2,54,36,057	₹ 2,54,36,057		
25		TOTAL EXPENDITURE	₹ 10,54,70,345	₹ 7,50,52,057	₹ 6,85,14,277	TOTAL INCOME	₹ 9,40,26,056
		LOSS AMOUNT	₹ 1,14,44,289	Saving	₹ 65,37,780		
		LOSS PERCENT (LOSS AMOUNT/TOTAL EXPENDITURE)	-10.85%		8.70%		

FOR BOARD OF TRUSTEE'S APPROVAL

HIGHLIGHTS OF THE ACA BUDGET 2024-25

a conservative approach to finances has led us to save 10% of the estimated budget for 2023-24

the estimate for 2024-25 accommodates a budget for the newly approved B Design program.

the estimate for 2024-25 accommodates a budget for state-of-the-art lab equipment.

the estimate for 2024-25 accommodates a budget for procuring more books considering new programs such as BFA and B. Design.

the estimate accommodates the newly envisaged outreach programs thereby inviting college students to visit the campus.

MINUTES OF THE MEETING OF GOVERNING COUNCIL

Date of Meeting: 01/04/2023

Venue: 6th floor, Board Room of the Institute

Time: 11:00 am onwards

Members Present –

1. Dr. Harishchandra Mishra ji, Chairman, Founder Trustee
2. Shri Ashish Mishra ji, Trustee
3. Shri Aditya Mishra ji, Trustee
4. Dr. Sunita Srivastava, Dean Management
5. Ar. Gurnath Dalvi ji, Ex-Principal, Director of L.S. Raheja College of Architecture, Ex- Vice President of COA
6. Ar. Sukumar Dharmadhikari ji, Practicing Architect, Eminent Architect, Businessman
7. Shri P. Chandrashekhra ji, Corporate, Founder Crescentia Strategists Inc.
8. Ar. Rajiv Mishra ji, Educationist, Architect, Principal, JJ School of Architecture, Director, Directorate of Art, Maharashtra
9. Ar. Sarita Deshpande, Principal, ACA
10. Faculty Nominee: Ar. Pranali Redkar, Assistant Professor, ACA, Er. Soham Chowdhary, Assistant Professor, ACA

Agenda of the Meeting:

1. To present the Budget 2023-24
2. To discuss about the activities conducted in 2022-23 along with the proposed activities for 2023-24.
3. Suggestions by Members of Governing Council

Meeting Chaired by Dr. Harishchandra Mishra ji, Chairman, Governing Council

The following was discussed in the meeting:

1. Ar. Sarita Deshpande, Principal, ACA, presented the budget for A.Y. 2023-2024 and it was suggested by Shri Dr. Harishchandra Mishraji Sir that to include the previous year actual figures in the budget.
2. Ar. Sarita Deshpande presented the achievements and activities of ACA on institution and student level. She also presented the academic work done by the students in A.Y. 2022-23.
3. It was suggested by Shri Dr. Harishchandra Mishraji Sir & Ar. Rajiv Mishra Sir to start a collaborative course for ACA & AIMS students which could benefit them in their career growth.

Time: 3.30 pm - 5.00 pm

ACA BRIDGES
SEMINAR

SHREE AMEYA PUBLIC CHARITABLE TRUST'S

 ISO 9001-2015 CERTIFIED

Cultivating Creative Architectural Minds in Mumbai

Aditya College of Architecture (ACA) in Mumbai stands as a revered institution for aspiring architects, known for its commitment to excellence in education. ACA has been ranked No. 1 architecture college in the city, according to the Times Top Institutes survey of 2022. ACA has cemented its position as a leader in the field. Accredited with ISO certification and affiliated with esteemed organizations like the Council of Architecture and the University of Mumbai, ACA prides itself on providing a comprehensive and immersive learning experience to its students.

Dedicated to creating an environment conducive to learning and growth, ACA boasts a cutting-edge infrastructure designed to inspire creativity. Its air-conditioned classrooms and spacious atrium provide students with a comfortable and stimulating atmosphere. The institute features a well-equipped seminar hall, classrooms resembling amphithe-

aters, and studios equipped with state-of-the-art smart board facilities and laboratories, all fostering innovative learning approaches and encouraging hands-on experimentation.

With a strong focus on design excellence, ACA offers design-intensive courses that fall under the umbrella of the Center for Excellence. It offers three courses for aspiring architects: the Bachelor of Architecture, the Master of Vocational Studies. These programs have achieved

remarkable results, boasting a 100% pass rate. Notably, three students from ACA have secured positions within the top 20 of the university merit list, a testament to the college's dedication to academic success.

ACA's impact extends beyond its campus through its annual international competition and conference known as the International Design Competition (IDC) and International Design Research Conference (IDRC). This highly regarded event attracts participants from around the world, fostering networking opportu-

nities and facilitating the exchange of innovative ideas. With the participation of esteemed international jury members, speakers, and industry experts, ACA students and professionals alike gain invaluable insights and broaden their horizons.

To bridge the gap between academia and industry, ACA regularly invites professionals from the architectural industry to engage with students. These industry experts participate in seminars, workshops, and formal events, providing invaluable knowledge. By fostering these connections, ACA ensures that students are well-prepared for the demands of the real-world architectural landscape.

The college actively participates in social events, demonstrating its commitment to community engagement and environmental stewardship. Activities such as tree planting on Environmental Day, beach cleaning initiatives, and beautification projects in local areas to

welcome G20 delegates exemplify ACA's dedication to social responsibility. One notable event is the Borivali Design Fair, which serves as a platform for professionals and locals to connect, fostering a sense of collaboration and creative exchange.

ACA students have also

achieved recognition at the district level, winning design competitions and showcasing their talent. These achievements highlight the college's emphasis on nurturing and showcasing students' creativity and innovation. The management at ACA is consistently striving to attract

the best talent from the industry to train and mentor its students. By ensuring that students learn from experienced professionals, ACA creates an environment that fosters growth, skill development, and industry relevance.

Aditya College of Architecture serves as a hub for shaping the creative minds of tomorrow. With a focus on design excellence, strong industry connections, and a commitment to social responsibility, ACA cultivates responsible, innovative, and talented architects who are well-prepared for the challenges of the profession.

Semester 10-THESIS

Architectural Design: 101- “Spatial Explorations”

First year B.Arch.- Semester 01

Studio faculty – Shruti P., Urvashi P., Kalyani V., Vishakha K., Muskan T.

BRIEF: Architectural Design was introduced with theoretical concepts of Elements of design, based on Form, space & order. Understanding architectural vocabulary, Design as a derivation of points, lines and planes; covered, semi-open spaces, Open spaces, ideas of enclosure, boundaries, liminal edges etc. The hands-on exploration delved into spatial exploration, building narratives, creating experiences, negotiating levels, story-boarding, and finally showcasing the process and outcome through their “first jury”.

STUDENTS WORK:

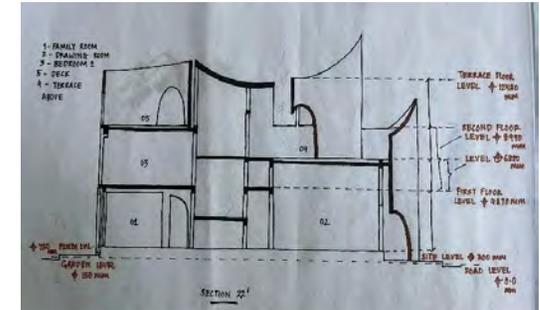

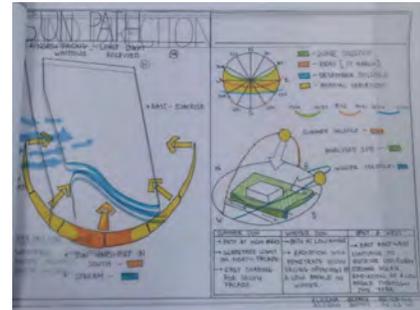

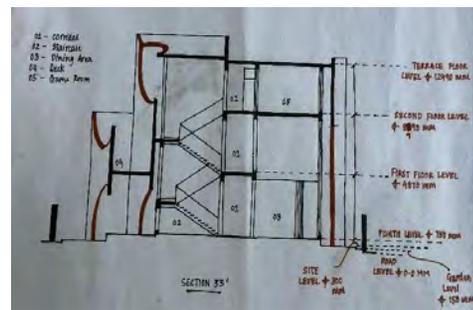

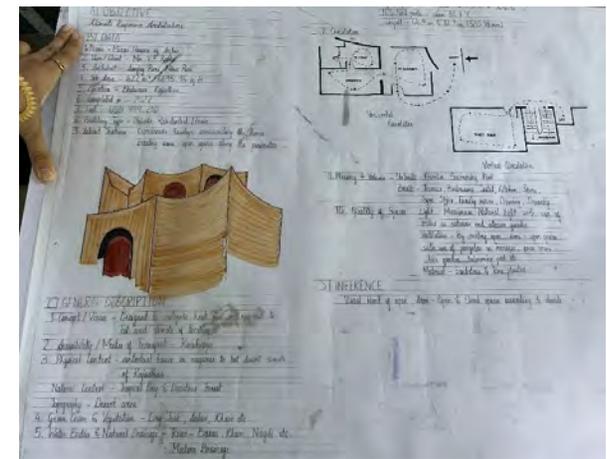

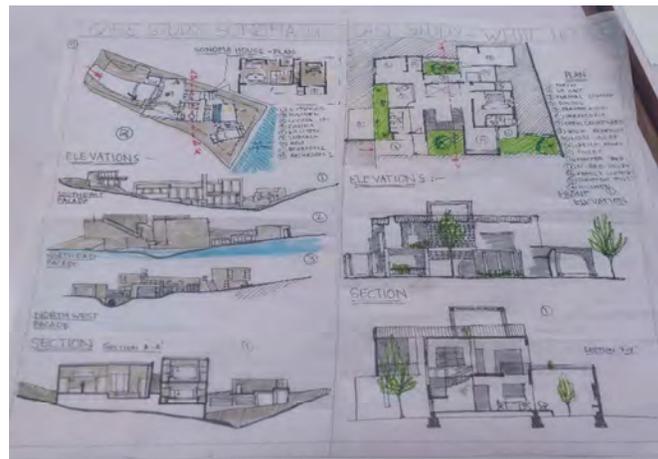

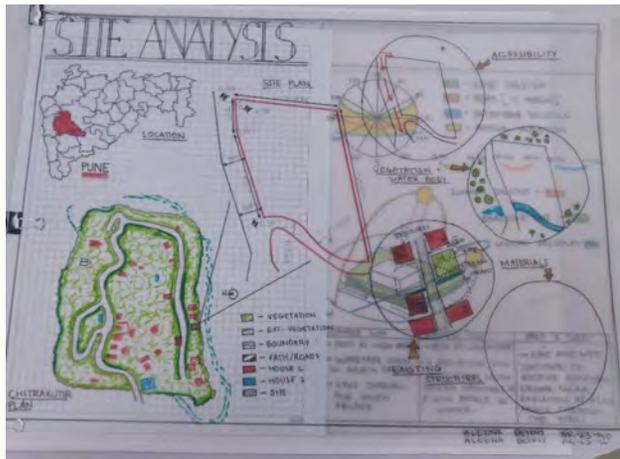

Architectural Design: 201- A Study in Context & Function - "Twin Residences"

First year B.Arch.- Semester 02

Studio faculty – Shruti P., Urvashi P., Kalyani V., Vishakha K., Amruta T., Jwalant D.

BRIEF: The studio aims to understand the site from a holistic point of view and explores contextual and functional demands, Understanding user needs and spatial planning

STUDENTS WORK:

2nd Year Architectural Design

Second year B.Arch.- Semester 03

Studio faculty – Ar. Jamshid B., Arun N., Muskan T., Vaishali K, Ar. Shruti P

PROJECT: “Incremental Community Housing”

BRIEF: In the First phase student are expected to research on community housing and architecture. Formulate and manifest their vision of community. Single architectural thought can guide and drive the design process to reach the result as SPACE. In the second phase detailing of concept is expected, where site visits and book case studies will play a major role in manifestation of perceived Space in grid. Understanding Space Grid with various Sizes, area requirement, spaces hierarchy, Covered and semi-open spaces, Open spaces etc. Designing building with Orientation, climate, usage of each space, interaction of indoor with outdoor spaces, community spaces integrated with Landscape. Third step consist of Building construction method, material, services, and technology integrated with technology studio.

STUDENTS WORK:

Area Requirements:
Housing for 20 to 30 tenements.
Parking and open spaces
Recreational/ community spaces
Café/ creche/indoor game area (depends on brief formulation)
Housing configuration:
Housing units (20 to 30 tenements)
Typology 1.- 75 to 90 sqm
Typology 2 - 50 to 75 sqm
Typology 3- 35 to 50 sqm
Typology 4 - 30 to 35 sqm

2nd Year Architectural Design

Second year B.Arch.- Semester 04

Studio faculty – Ar. Jamshid B., Ar. Jwalant D., Arun N., Muskan T., Vaishali K, Ar. Shruti P

PROJECT: FRIENDSHIP CENTRE

AIM: The aim of the design is to sensitize the students to the significance of the historic architecture within a city and its influence on the lives of the people thus shaping the cultural heritage of the place.

BRIEF: The design studio will focus on developing proposals for a “Friendship Center” that brings together the local communities of varied religious, cultural, and economic strata within the city and particularly in the immediate neighborhood of Shahjahanabad, Bhopal.

3rd Year Architectural Design

Third year B.Arch.- Semester 05

Studio faculty – Ar. Manjusha N., Ar.Anjuri A, Ar.Pritam S., Ar. Neha T.

PROJECT: “4-star Business hotel at Navi Mumbai”

BRIEF: The first phase involves researching architecture for urban commercial, recreation, and entertainment activities for large groups. Students formulate their vision and formulate their vision, using single architectural thought to guide the design process. The second phase involves detailing the concept, with site visits and live and reference book precedent-studies playing a major role in expressing the perceived design. The design involves understanding the potential of urban land, optimizing spaces, and understanding architectural forms and their functions specifically focusing on the requirements of a 4-star business hotel such as Front of the House (Guest) operations and Back of the House (Staff) operations. The third step involves detailing the design brief based on construction methodology, materials, services, climate, and technology, and is integrated with a technology studio.

STUDENTS WORK:

Area Requirements:

4 Star Business Hotel Requirements including

- Parking and open spaces
- Guest Spaces including the Lobby, Banquet Halls, Restaurant(s), Coffee Shop, Business Centre
- Guest Rooms (70-80) with a mix of single, double & suite rooms – Min. area 140 sq. m.
- Recreational Spaces such as Spa, Pool, Gym, Shops, indoor games etc.
- Administrative Spaces (Back of the House) including Front & Back offices, Kitchen(s), staff changing areas, surveillance room, loading/unloading zones, service spaces etc.

Architectural Design: 701- Density & Pragmatism - “Mass Housing in Mulund”

Fourth year B.Arch.- Semester 07

Studio faculty – Rita N., Samir H., Varsha S., Urvashi P., Khusbu S., Pranali R.

BRIEF: The studio started with mapping Neighbourhood development, including historic growth, urban issues and challenges. The exercise further progressed with massing studies at studio-level, Landscape-driven master-plan strategies and design-development of each cluster/ component of the project. The studio outcome included pragmatic resolution of user-needs, technical requirements, exploring street-level urban design interventions and encouraging new paradigms of urban development.

STUDENTS WORK:

Fifth year: sem 9

AIM: Design Dissertation Subject is The Final Year

Thesis Under Individual Faculty Mentorship Which Is Submitted as A Research Black Volume In Sem 9.

The Same Research Based Topic is taken forward in Sem 10 to An Architectural Project With Complete Details Of Design, construction, Structure, Services, Net zero strategies and sustainability, which is submitted by every Student to qualify in the Final Sem 10 Thesis Jury which is conducted under Mumbai University.

METHODOLOGY: Students Are made to research and then present 3-4 Topics Out Of which 1 Is finalised In A structured synopsis To Be Further Taken Ahead Under Literature Review, case Study Analysis, Site Finalisation And Design Brief Formulation In Sem 9.

This Same Thesis Subject Is Completed As An Elaborate Architectural Project In Sem 10 Complete With Software Skills, Presentation And Details.

ADITYA PRAJAY_KD01_AR-19-011 REDESIGNING THE INNER-CITY CORE- "An Architectural synergy - a catalyst for change"

Scope

- The research focuses on the existing mixed-use fabric of ward traditional markets within the metropolitan region.
- Based on the review of literature and site work, this research aims to identify a symbiosis with rich heritage and a deep sense of identity after evaluating potential sites, to identify landmarks which would best be cleared to enable the neighborhood in its efforts to conserve its tangible and intangible aspects effectively.
- Furthermore, evaluating mixed used factors of the site in terms of sociability, safety or accessibility imbalances to enhance the experience of the people in the community.

Limitations

- Projects that need immediate attention and development that is not market driven while conserving their cultural and social aspect.
- The area of study will be those which is vulnerable and in need of revival would be taken up and the limits would be set to those parameters to a specific area.

ADITYA PRAJAY_KD01_AR-19-011 REDESIGNING THE INNER-CITY CORE- "An Architectural synergy - a catalyst for change"

Sociability within spaces

Importance Of Public Spaces For Expression

Understanding the spatial development and Street Analysis

Public spaces are vital components of urban development, creating the life into what we recognize as a city while shaping the metropolitan within. A clear examination reveals a link between the existence and design of public spaces and metropolitan spaces. Now these spaces are conceived, managed, and utilized reflects a society's culture, organization, and socio-political.

Thinking regarding cities, we must recognize that public spaces are not mere white between buildings; they are the beating hearts where the pulse of a community's expression, identity, and autonomy resonates. The significance of public spaces lies in their ability to cultivate a shared sense of identity and provide a stage for the unfolding stories of urban life.

Key streets identified:

- 1) Chawli Patel Tank Road
- 2) Paryag Road
- 3) Bhamburda Road
- 4) Mohammed Ali Road
- 5) Kalkbunder Road to train Kankarnagar Road
- 6) Kite Street

Not just pavement, a great street should help move community. A great street should be a most diverse place to be in spare time, to live, to play, to work... Streets are settings for activities that bring people together. (Jan Gehl, 2002)

Perennial safety concerns, aging infrastructure, and the need for thoughtful urban planning underscore the imperative for comprehensive redevelopment initiatives. By addressing these challenges, a reimagined urban core has the potential to preserve cultural identity, foster community bonds, and reignite economic vitality in this historic neighborhood.

संरक्षण : Exploring and Promoting the Lost art and Traditional Cuisine of Tarkari

PRESERVATION AND PROMOTION OF TRADITIONAL ART FORM AND RURAL CUISINE

RESEARCH METHODOLOGY CHART

HYPOTHESIS

Providing a cultural exchange centre promoting art and local cultural development which would help in raising the social and economic status of the people of Tarkari.

OBJECTIVES

- To study and understand the daily lifestyle and need of the local community of Tarkari.
- To study the location pattern of Tarkari.
- To study the prevalent art forms and cuisines of Konkani region.
- To study the status of the Konkani art and identifying their issues, limitations, and reasons behind its fading.
- To establish an institution that would provide the resources and abilities necessary for artisans, amateur designers, young craftsmen, home-makers, health, and students, while also combining physical, spiritual, knowledge, and human interaction via architecture.

RESEARCH QUESTIONS

- What is the profile and requirements of the local community?
- What are the traditional arts practiced in Konkani region?
- What is the status of the Konkani art forms in today's scenario with respect to its social and economic aspects?
- What are the issues and the problems faced by the artistic community?
- What are the rural cuisines prepared in Konkani region?

ALLIED DESIGN

AIM: The Subject Aims At Enriching The Students With Different **Concepts Of Design, Starting From Fundamental Concepts To Complexities Of Urban Design.**

METHODOLOGY: The Preliminary Stage Is To Understand The **Basic Elements And Principles Of Design**, Followed By Space **Organization In Interior Layout**, Then To Enable The Students To Understand The **Natural Environment And To Design Landscape**. Understanding The Complexities Of **Urban Theories And Sociology** Followed By Introduction To **Town Planning** And Lastly To Learn **Urban Design** That Assist To Make **Connection Between People And Place** And **Convert Spaces Into Places.**

Basic Design (Sem I)

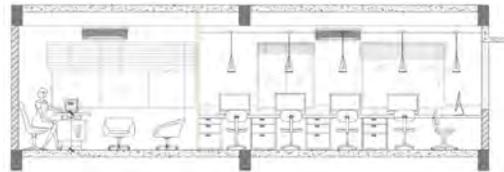

The exercise was to bring out the hidden quality amongst the students and depict the same in varied fonts.

Learning the elements and principles of Design and representing 1 principle through 2D and 3D composition

Interior Design (Sem III and IV)

Landscape Design (Sem V and VI)

Urban Studies (Sem VII)

Urban Design (Sem IX)

Environmental Studies

SEM 1

AIM: The aim of this assignment is to explore the relationship between natural and built environment.

Model: The objective of this assignment was to focus on the traditional architecture in various climate zone and its response to climate.

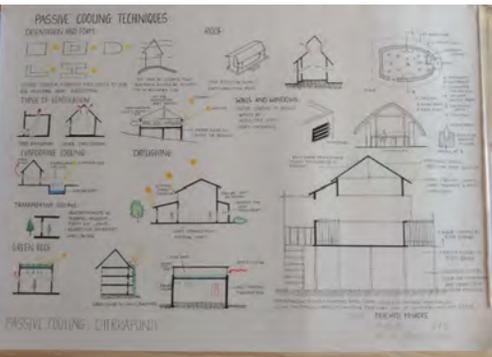

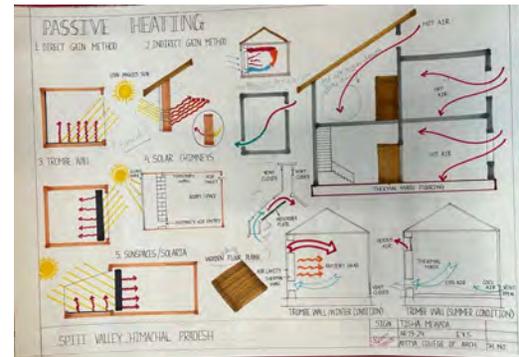

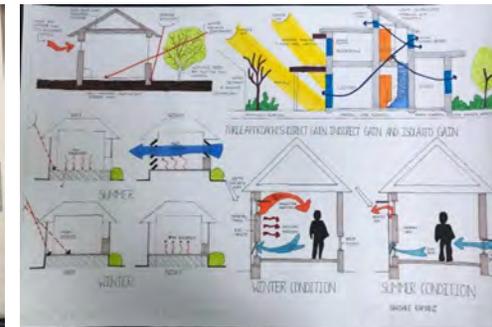

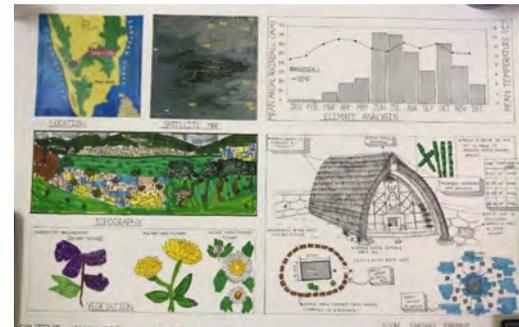

SEM 2

AIM: The aim of this assignment is to explore the concepts of sustainable development and effects of Architecture on nature.

Context Analysis : The objective of this assignment was to understand the impacts of climate on architecture by focusing on Topography, Climate and neighborhood

Passive Heating/Cooling : The objective of this assignment was to understand passive heating on cooling techniques in various zones

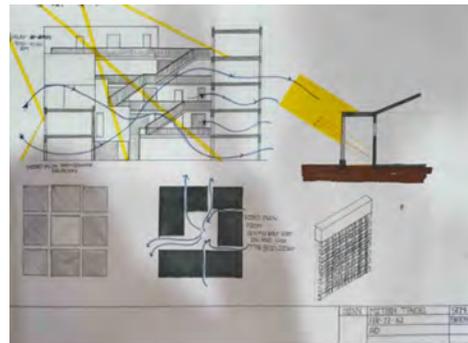

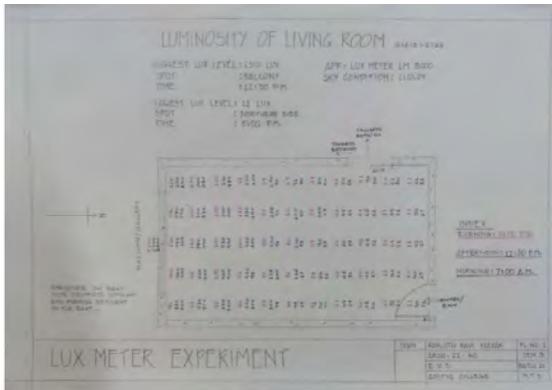

Environmental Studies

AIM: The aim of this assignment is to explore passive methods of environmental control in architecture, focusing on climatology, building sciences, and human comfort. By understanding the principles of microclimate and macroclimate, energy flow in buildings, and traditional methods for achieving comfort, students will learn how to design environmentally responsive and comfortable spaces using passive design strategies.

Lux meter assignment

- The objective of this exercise is to familiarize students with the concept of natural lighting and the measurement of illuminance using a lux meter.
- Through hands-on experience, students will learn how to assess the quality and quantity of natural light in different spaces and understand its implications for architectural design.

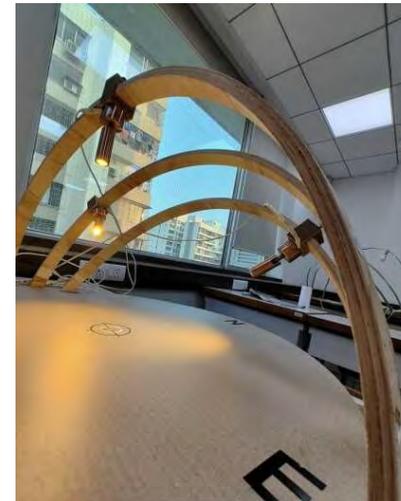

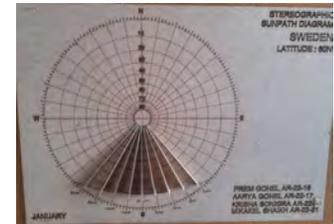

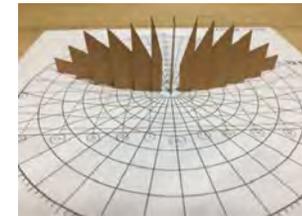

Fenestration model:

The objectives of the fenestration model include understanding fenestration design principles, exploring daylighting and ventilation impacts, integrating building codes, hands-on design exploration, evaluating visual and aesthetic effects, fostering problem-solving skills, enhancing communication abilities, considering contextual factors, and promoting sustainable design practices.

Heliodon Model

- Understanding Solar Geometry: Learn how solar angles and positions change throughout the day and across seasons, crucial for effective solar-responsive design.
- Visualizing Solar Shading
- Analyzing Daylighting
- Optimizing Solar Access:
- Promoting Sustainable Design

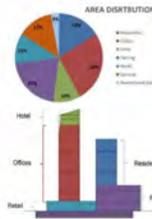

Sun path model:

The objectives of the sun path model include understanding solar movements throughout the year, visualizing solar access and shading patterns, optimizing building orientation for passive solar heating and cooling, analyzing daylight availability for interior spaces, promoting sustainable design practices, facilitating architectural visualization, developing problem-solving skills, considering site-specific factors, fostering interdisciplinary collaboration, and preparing students for environmentally responsive architectural practice.

EVS

AIM: To understand how to evaluate and apply sustainable building strategies over design

10th semester EVS: This subject primarily aimed at an understanding of Global issues at the urban level, and their integration at micro level planning and designing. The core topics covered here were, post-occupancy evaluation of building, Environmental impact assessment, and Urban Sustainability. Studio-based lecture and assignments were given to students. To understand post-occupancy evaluation, D.D/Thesis was taken as a live case study, and students in groups came up with various observations and suggestions. This enabled their analytical skill and oriented them to the concepts that could be integrated with their design dissertation at the urban level and site level.

PROBLEM

According to the study findings, individuals are encountering challenges during the summer months in Aurangabad. One notable issue is the difficulty faced by users when sitting in the afternoon, primarily due to the excessive heat prevalent in the region. The discomfort is exacerbated by the limited presence of vegetation on the south and west sides of the building, which offers minimal shading during the scorching sun.

Aurangabad's climatic conditions, particularly the prevalence of wind from the west, contribute to the overall discomfort. The orientation of the building, which is not aligned with the prevailing wind direction, further exacerbates the problem. In such a scenario, where the building's orientation and the lack of vegetation on the south and west sides of the building compound the problem, it is imperative to explore innovative strategies to mitigate the impact of the extreme heat, making the interior more comfortable and sustainable for the users.

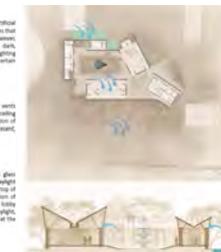

The study emphasizes the need for strategic measures to address the challenges posed by the summer heat in Aurangabad. Implementing sustainable solutions such as incorporating vertical vegetation on the south and west sides of the building can contribute to creating a more conducive environment for users. Additionally, exploring options to enhance the building's insulation or provide shaded seating areas can help mitigate the impact of the extreme heat, making the interior more comfortable and sustainable for the users.

Light: The lobby has ample artificial lighting, which is not sufficient for the natural light. However, the overall space appears quite dark, suggesting that the artificial lighting may not be sufficient during certain times of the day.

Ventilation: There are no visible vents or air-flow systems, but the high ceiling could help in the natural circulation of air, if mechanical ventilation is present, it is not visible.

Shading: The lobby has a high glass facade which allows for some sunlight to enter the space, however, the top of the facade and the distant position of the glass from the back of the lobby may limit the penetration of sunlight, resulting in a darker appearance at the far end.

REMEDY 1

To address the challenges posed by extreme heat in Aurangabad during summer, a remedial solution involves the strategic placement of a water body on the western side of the building.

Additionally, installing a fountain in the courtyard can contribute to cooling the air and subsequently maintaining a more comfortable temperature within the building.

This thoughtful approach not only enhances the cooling effect of water but also introduces the overall aesthetic appeal of the courtyard. By creating a cooling micro-environment, these measures aim to mitigate the impact of the scorching heat, ensuring a more pleasant experience for users sitting in the lobby in the afternoon.

Evaporative Cooling

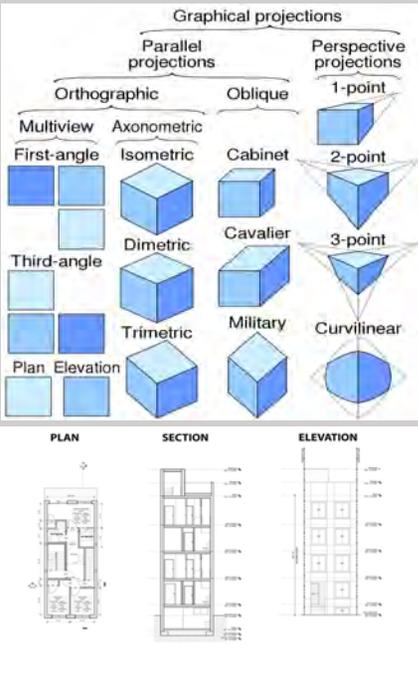

Identify the cooling evaporative cooling

ARCHITECTURAL REPRESENTATION & DETAILING (ARD)

AIM: Training The Students To Prepare Drafting Skills And Expressing The Design In The Form Of Drawings At Various Stages Of The Project.

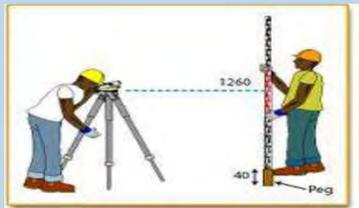

METHODOLOGY : Preparing Hand Drawn Drawings Plan, Elevation & Sections, Working Drawings For Execution At Site, Municipal Drawings For Obtaining The Approval From The Authorities And Finally In The Last Year To Prepare A Buildable Project

FIRST YEAR

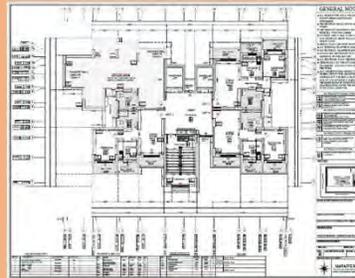

Plan, Section, Elevation
Architectural Drawings
Explained

SECOND YEAR

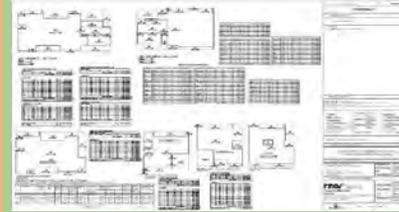

Understanding Surveying &
Leveling of Site topography

THIRD YEAR

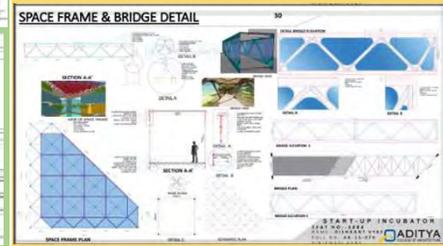

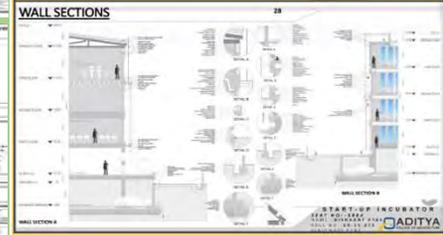

Students trained for
preparing
Working Drawings

FOURTH YEAR

Students trained for Bye-
laws & preparing
Municipal Drawings

FIFTH YEAR

Students prepared for buildable
designs as part of their Design
Dissertation

B.Arch. - Architectural Theory

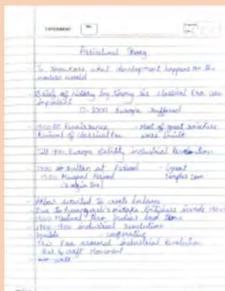

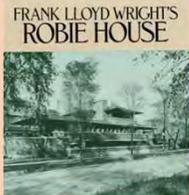

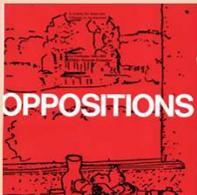

AIM: To introduce, study, and understand the socio-cultural circumstances, art, and architecture across different time periods – from prehistoric settlements to today.

METHODOLOGY: The courses and content of Humanities were chosen with respect to academic year and level of proficiency required and expected at that stage. While first years were introduced to various prehistoric tribes, settlements, and civilizations across the world, the second years were introduced to medieval era civilizations, art and architecture. The third years were introduced to modern movements in art and architecture, familiarizing them with various architects and their works as well as creating awareness with the urban context specifically focusing on Mumbai.

SECOND YEAR

SEM 3 – To study and understand Architectural Theory using Reading as a medium (through summarization of reading materials & in-class readings)

Reading material based on theories like Art and craft movement, Art nouveau, Art deco, Bauhaus, International style, Modernism, Post-modernism and other related theories.

Reading material

SEM 4 – To write with clarity about architecture and ideas in architecture and to be able to correctly use architectural terms to communicate architectural ideas.

Reading material: The Architecture of the City - Aldo Rossi

Purpose: Understanding the criteria/values that attribute heritage/historic significance to a building/place based on the concept of "urban artifact" as propounded by Aldo Rossi and implementing the same in writing and presenting idea through illustration (in context of the Architectural design project).

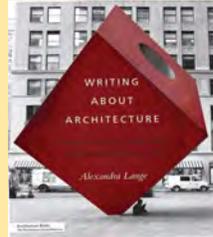

THIRD YEAR

SEM 5 – To study and understand Architectural Theory with Research and Criticism as the focus.

Reading material: Writing About Architecture: Mastering the Language of Buildings and Cities – Alexandra Lange

Purpose: The book provides a comprehensive guide to writing effectively and critically about contemporary cities, focusing on works by influential architects like Ada Louise Huxtable, Lewis Mumford, and others. Based on these readings & class discussions, the students were taught how to write research papers, prepare and present conference posters, and write a critical essay based on an actual architectural essay competition brief. understanding of the field.

FIFTH YEAR

SEM 10 – To study and understand Architectural Theory with Advanced Theories as the focus through summarization, class discussions & debates related to both advanced architectural theory and topics pertaining to their DD

Contemporary Architectural Theory

In contemporary architectural discourse theory has become more concerned with its position within culture generally and thought in particular. This is why university courses in architecture theory have often appeared just as much time discussing philosophy and cultural studies as buildings, and why advanced postgraduate research and doctoral dissertations focus on philosophical issues in connection with architectural theory. Some architectural theorists are at discussing philosophical themes as though in direct dialogue with philosophers, as in the case of Peter Eisenman and Bernard Tschumi's interest in Derrida's thought or Anthony Vidler's interest in the works of Freud and Lacan, in addition to an interest in Gordon Brundstedt's 'Practice of Space' or even in John Habicht.

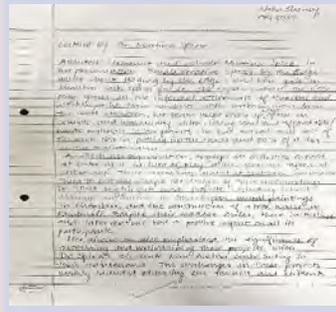

This has also been the case with education in architecture like Dalziel Shady or Alberto Ferrus Guesca, and in more recent years this philosophical orientation has been reinforced through the research of a new generation of theorists (G. G. Griffin, Kwon on 'Situated Epistemology').

Similarly, we can refer to contemporary architects who are interested in philosophy and cultural studies. Some are interested in phenomenology and neuro-aesthetics like Sarah Williams Goldhahn, Sarah Siskind, and Christian Norberg-Schulz, in particular in phenomenology and Heidegger's thought. Others, like Rem Koolhaas and Greg Lynn, expand historical understandings of architecture to include lesser-known movements that have influenced the development of architectural ideas over time.

POST-MODERNISM

Postmodernism is largely a reaction against the intellectual assumptions and values of the modern period in the history of western philosophy (roughly, the 17th through the 19th century). Indeed, many of the doctrines characteristically associated with postmodernism can easily be described as the straightforward denial of general philosophical viewpoints that were taken for granted during the 18th-century Enlightenment, though they were not unique to that period. The term is associated with Neoplatonism, irony and philosophical critiques of the concepts of universal truths and objective reality.

The term was first used around 1970. The term was first used around 1970. As an art movement postmodernism to some extent defies definition – as there is no one postmodern style or theory on which it is hinged. It embraces many different approaches to art making and may be said to begin with pop art in the 1960s, and to embrace much of what followed including conceptual art, neo-expressionism, feminist art, and the Young British Artists of the 1990s. As an art movement postmodernism to some extent defies definition – as there is no one postmodern style or theory on which it is hinged. It embraces many different approaches to art making and may be said to begin with pop art in the 1960s and to embrace much of what followed including conceptual art, neo-expressionism, feminist art, and the Young British Artists of the 1990s.

B.Arch.- Humanities

AIM: To introduce, study, and understand the socio-cultural circumstances, art, and architecture across different time periods – from prehistoric settlements to today.

METHODOLOGY: The courses and content of Humanities were chosen with respect to academic year and level of proficiency required and expected at that stage. While first years were introduced to various prehistoric tribes, settlements, and civilizations across the world, the second years were introduced to medieval era civilizations, art and architecture. The third years were introduced to modern movements in art and architecture, familiarizing them with various architects and their works as well as creating awareness with the urban context specifically focusing on Mumbai.

FIRST YEAR

SEM 1 –Studied Tribes (Culture and Architecture through Model and Sheet)

SEM 2 –Studied Civilizations (Culture and Architecture through Model and Sheet)

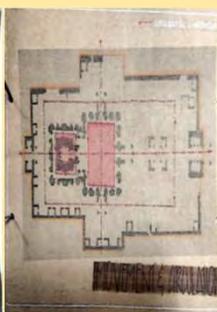

SECOND YEAR

SEM 3 –Studied Medieval Civilizations (Culture and Architecture through Model and Sheet)

SEM 4 –Studied Medieval Civilizations (Culture and Architecture through Sheet)

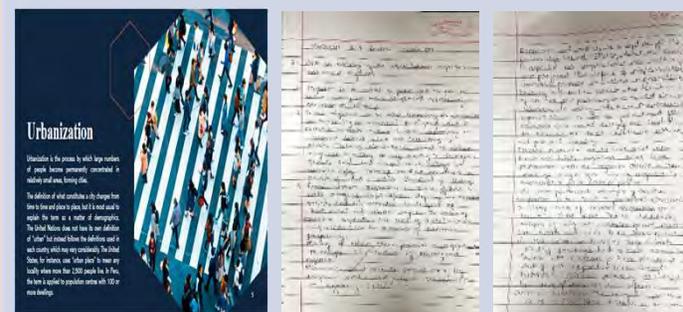

THIRD YEAR

SEM 5 – Studied Modern Civilizations (Culture and Architecture through Presentations)

SEM 6 –Studied need for ego in humanities, the urban context and the case of Mumbai and the MMR (Culture and Architecture through Assignments)

B.Arch-ELECTIVE

AIM: To introduce skill-based courses to enhance students Thinking skills, Personal skills and Psychomotor Skills.

METHODOLOGY: The courses and content of Electives were chosen with respect to academic year and level of proficiency required and expected at that stage. While early levels were introduced to various hand on and digital courses in Model Making, Rendering and AutoCAD, higher level worked upon various mediums of digital presentation such as Mapping methods, exploring future with project management, Urban mapping and interpretations, Presentation skills with Sketch up and Rhino.

FIRST YEAR

SEM 1 –Model Making

SEM 2: RENDERING SKILLS AND TEXTURES

SECOND YEAR

The elective concentrated on Abstraction of the architectural theory by taking references from styles like Bauhaus, De Stijl, Art Deco, Deconstructivism, etc

To Learn 3D Modelling And Drafting Software Google Sketchup and be Able to Apply 3D Modelling skills in their Design Subjects.

THIRD YEAR

Drawings and 3D Model's on Computer Aided Design Softwares. Such Autocad, Sketchup and Photoshop also AI Image Generating Tools- with AI.

To Learn advanced 3D Modelling on Software RHINO and its PLUGINS for presentation of portfolios and Conceptual ideas.

FOURTH YEAR

Study of a Particular Urban Site and Study it by Mapping the existing Scenario's, on the surroundings of the buildings, landscape, Topography and rest of the Topographical mapping.

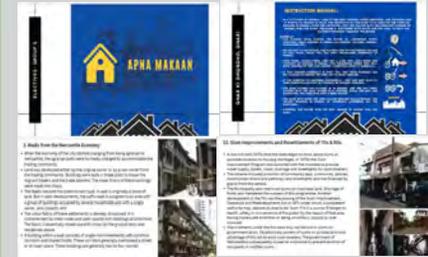

SCHOOL AND OPEN GROUND

FIFTH YEAR

The students were given a first hand introduction to PROJECT MANAGEMENT based on our college resources

B.Voc- INTERIOR DESIGN STUDIO

AIM: To understand and enhance the **design acumen** in space planning, in relationship with anthropometrics, services, furniture, materials. The scale and complexity of **Progressively Increases** With Each Semester, with emphasis on **Sustainability, Construction methods, Aesthetics and Services** integrating in a holistic design. In the First-year Residential spaces are handled with more emphasis on Abstraction, anthropometrics and styles of furniture, and as they progress to the senior year Specification of material, costing, services, Joinery detailing along with innovative aesthetics is considered,

FIRST YEAR

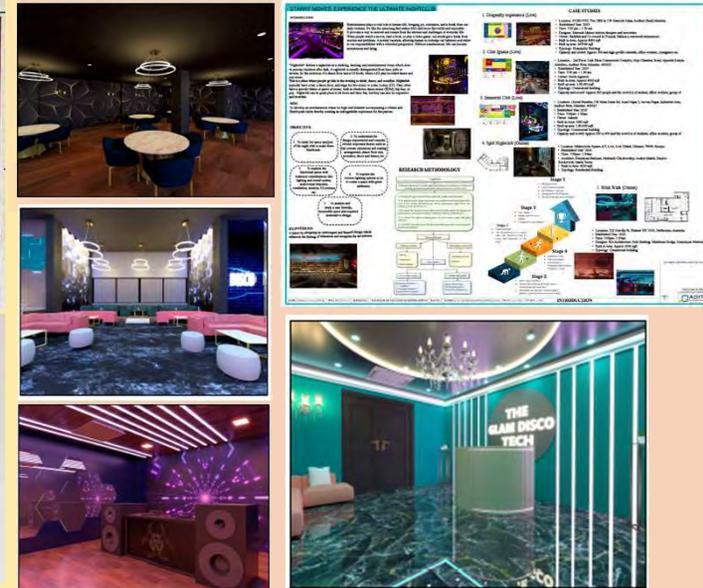

Residential interior space of approx. 60 Sq.Mts. for Sem-1
 Basic Planning with furniture layout along with a theme representation through hand drafting of plan, sections and material understanding.
For Sem-2 residential project of 3BHK of approx. 125 sq.mt is given

SECOND YEAR

Bungalow and Theme Restaurant for Sem-3
 Students were given Topic such as **Bungalow of 300 sq.mt and Themed Restaurant of 150 sq.mt.** Drawings were created using various hand rendering and presentation techniques.
For Sem-4 commercial office space of approx. of 900 sq.mt is given

THIRD YEAR

Design Dissertation & ID portfolio Sem-5 of approx. 500 Sq.Mt
 Topics ranged from night clubs, casinos, cultural centers, meditation center, textile centers, preview theaters, library, boutiques etc.

B.Voc- ALLIED STUDIOS

ELECTIVES

The topic for Elective courses is developed by individual colleges based on the current trends in the practice and availability of resource persons & the topic is selected by the students this year are Furniture and Light Design.

BASIC DESIGN

Basic design defines the base of design aspects, in terms of design elements and principles that are generically applicable to any design stream including interior design. The subject aims at developing observational and creative skills that would enhance the visual perception of students and evolve aesthetic sensitivity.

Basic Design Portfolio

Students studied different elements of design, principals of designs, color theory, Notan ART which they applied them in their design portfolio.

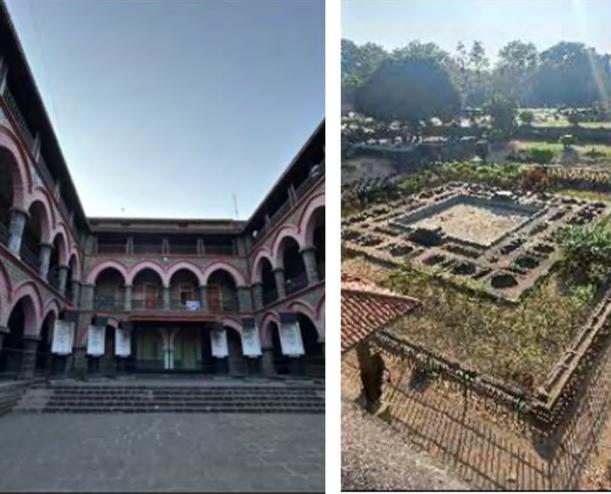

CONSTRUCTION

Aim: To understand the construction techniques of the interior elements through working models.

With the help of model's students learnt different types of staircases.

1st Year : PUNE

2nd & 3rd Year : BHOPAL

4th Year : KERALA

Indoor+ Outdoor assignments as well as ISR activities

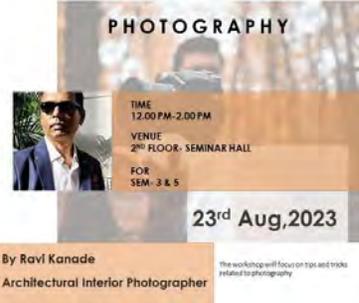

Entries shortlisted for State Art Exhibition.

B.Voc- WORKSHOPS - SEMINAR - STUDY TOUR

WORKSHOPS

B.VOC conducted a series of workshops & Seminar for its interior designing students in the ongoing academic year such as PHOTOGRAPHY, RENDERING TECHNIQUES, FLORAL FOAM ART, CALLIGRAPHY WORKSHOP. The workshops aimed to provide hands-on experience and exposure to the latest techniques and approaches in the field of interior design.

PHOTOGRAPHY

TIME: 12.00 PM-2.00 PM
 VENUE: 2ND FLOOR- SEMINAR HALL
 FOR: SEM- 3 & 5

23rd Aug, 2023

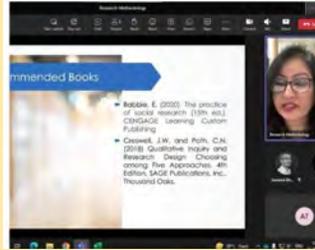

By Ravi Kanade
 Architectural Interior Photographer

The workshop will focus on tips and tricks related to photography

List Of Workshop Conducted:
 -Photography - Calligraphy
 -Illustration - Floral Foam

SEMINAR

Interior Design Projects

TIME: 1.00 PM-2.00 PM
 VENUE: STUDIO-7TH FLOOR
 FOR: SEM-2 & SEM 4

12th Jan, 2024

By Ar. Abhishek Ray
 Principle Architect

The seminar focuses on the latest trends in interior design projects

List Of Seminar Conducted:

- HVAC - understanding of different types of AC
- Interior Design – Museum Design styles
- Research Methodology – Thesis formulation guidance
- Alumni Series –Working flow of DD
- EBCO – Furniture Hardware fittings
- Journalism – Writing Skills

STUDY TOUR

The aim of the study tours is to provide the students with an opportunity to experience and learn about the rich cultural heritage and interior of different regions. The students were able to explore and observe various interior styles and design elements first-hand, enabling them to gain valuable insights and practical experience of different variety of Interior style themes

- AGRA-JIM CORBETT-NAINITAL

AMOL BAPAT He has Over 20 years of extensive experience in India as an Architect in various capacities. **Specialties:** His major Focus is on technicality. Lately he is majorly involved in Project Management Consultancy involving re-development of old Housing Societies. In the Education field, he possess more than 11 years of full time teaching experience.

ASHISH AMLE proceeded to enhance his software skills. He is proficient in BIM, MS project, Prima Vera, Revit, STAAD pro and other architectural related software. He has been teaching as visiting faculty in several colleges.

It is with great grief to state that we lost the courses founding member Prof. Ashish Patankar, who was a great teacher and was a source of inspiration to many a students.

M.Arch- STUDIO

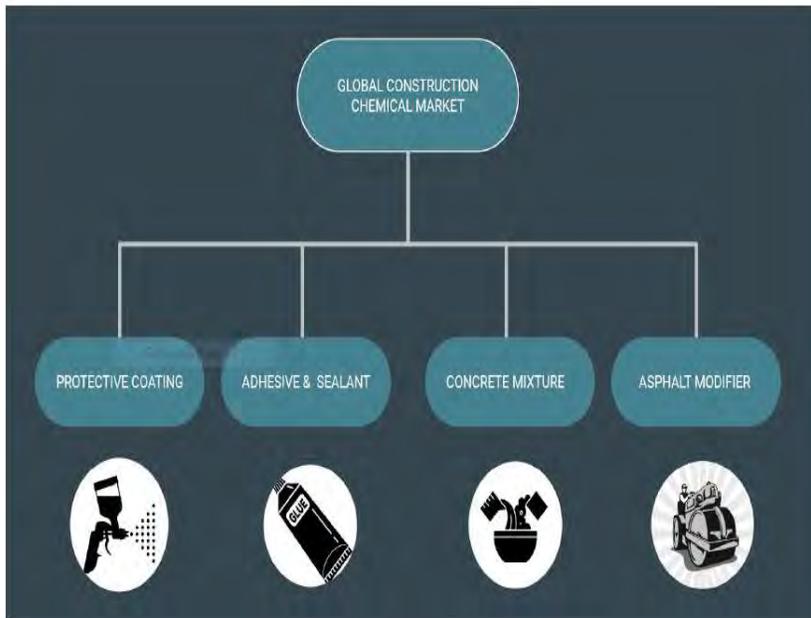

AIM: The Aim of the studio is to teach various subjects like Construction materials & its management along with Computer applications to the students.

METHODOLOGY:

Learning through presentations and Research on various topics to be covered in the syllabus.
Computer applications provides practical hands on experience to each student in the various industry software

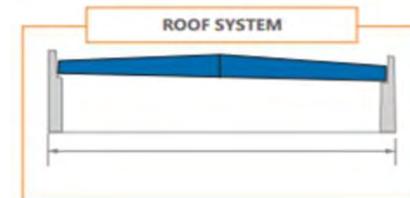

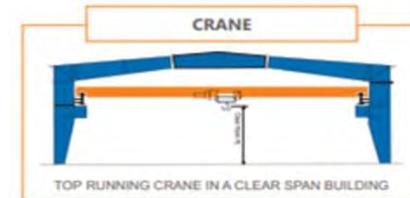

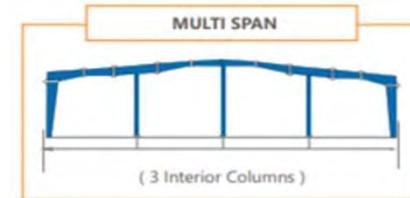

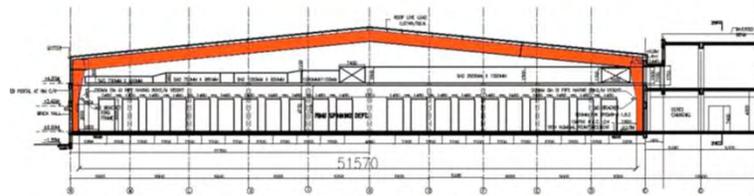

CONSTRUCTION MATERIAL AND MANAGEMENT

In this subject students are expected to research on modern materials and techniques with respect to the project management of the same. Students are encouraged to explore unconventional and sustainable, recycled materials

COMPUTER APPLICATIONS

Students are introduced to software which are prevalent in the field like MS projects and advanced excel This not only increases their knowledge base but also makes them well rounded professional equipped to handle large scale projects

M.Arch- ELECTIVE

AIM: To Train The Students on live projects and by understanding the sequence of events and various aspects that govern the execution of the project.

METHODOLOGY : Project management of a said portion of the site is planned considering the various stakeholders and understanding the workflows. Studies also includes various strategies for reducing cost and coordination of the various agencies to execute the project with established timelines

ELECTIVE 1

In this subject students study a live project and understand it in terms of scheduling costing and detailing,

PODIUM SOFTSCAPE – Softscape & seating area

SCHEDULE OF WORKS:
Podium RCC Slab construction completed. (Not in scope)

Surface area clearing (3-4 days)

Preparation of water proofing material

Application of water proofing coat (Dr. Fixit, Sunanda, Roff etc.) (7-8 days)

Preparation of brick bed and cement sand along with drainage and covered electrical material top soil with mulch, landscape etc.

Brick bat coblaying and ponding test with necessary vault complete with laying of drains for podium surface drainage (20-25 days)

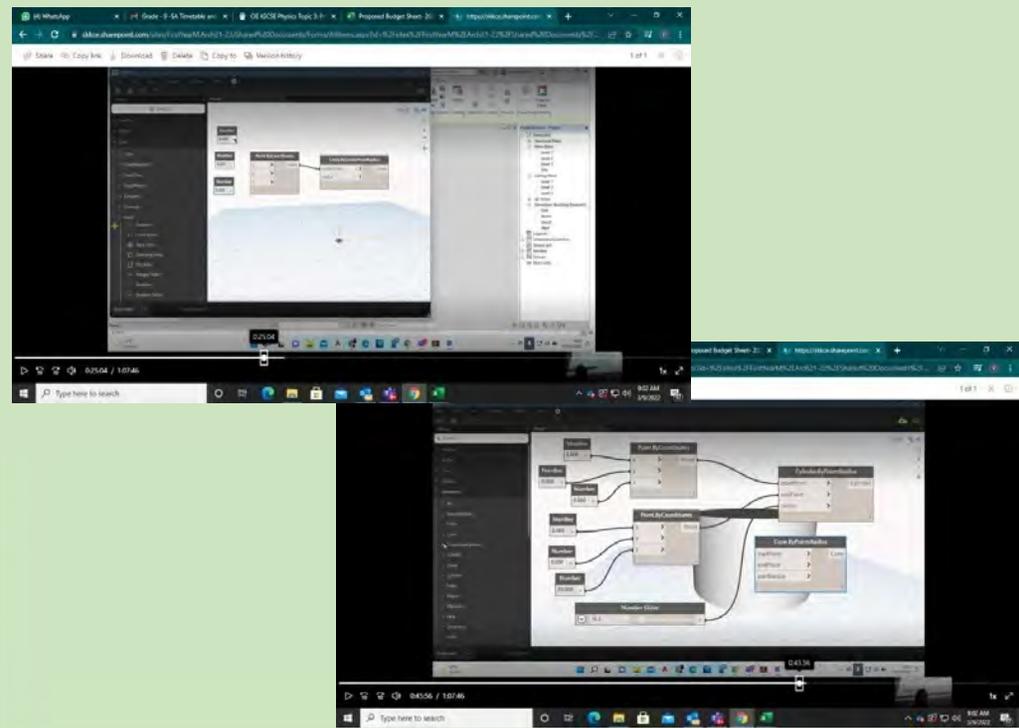

Procurement of required plants and ready-made landscape furniture and accessories and setting of site irrigation system

Adding of soil, along with manure and fertilizers

roof deck & bench detail

ELECTIVE 2

Students are taught support software like REVIT & DYNAMO that allow data to be converted to excel and increase the efficiency of timelines

SEMINAR

AIM: The Objective Of Conducting Webinars at ACA Is To **Improve The Knowledge Base** Of The Students And At The Same Time **Exposure to Industry**
METHODOLOGY : Seminars/Webinars are Conducted By Professionals On Subjects **Relevant To The Academics** Of Each Semester And The Expertise Of The Speaker .

Achievement: Across B.Arch and M.Arch and B.Voc, ACA Bridges has conducted more than 12 seminars for students benefit

B.ARCH

<p>ACA Bridges - Seminar Architectural Journalism By : Khushbu Soni and Khyati Antroliya 14th July 2023</p> <p>Venue: 2ND FLOOR, SEMINAR HALL Time: 12.30 PM onwards</p>	<p>ACA Bridges - Seminar Heritage Conservation - Tangible and Intangible By : Ar. WORKSHOP COMMITTEE

AIM: To provide student with an opportunity of focused learning and hands on experience by inviting experts from industry and conducting the Faculty Development Program.

METHODOLOGY : Organising a 2-3 day hands on practice by experts of subject.

• Identification of subjects is done in start of the annual year.

• **Achievement:** HANDS ON Workshop as per the Semester needs are showing instant applications in their respective work portfolios.

ACA- WORKSHOP

- Induction week sketching workshop.
- 3-day hands on workshop on Laurie Baker site(STUDY TOUR), Rendering, SketchUp, Rhino Softwares

WORKSHOP COMMITTEE

AIM: To integrate sustainable practices into all facets of our operations, curriculum, and community engagement efforts.

METHODOLOGY : Identifying Types of activities to engage students with society at various levels round the year.

•Achievement: On site interaction of students with society instills a sense of community connect and sensitivity to requirements.

INTERNATIONAL DESIGN COMPETITION 2023-24

COMPETITION THEME: "Architecture by the Edge"

In alignment with the vision of *Globally Recognised Leadership in Architectural Education*, the International Design Competition provides a global platform for under-graduate and post-graduate students of architecture as well as young architects to put forth innovative design ideas and push the boundaries of architectural thought.

This year's theme aims to bring into focus the poignant concern of water as a perishable resource and to resurrect the deep connections and sanctity synonymous with the use of water.

IDC 2023-24 Announcement

ADITYA COLLEGE OF ARCHITECTURE, MUMBAI PRESENTS

INTERNATIONAL DESIGN COMPETITION

ARCHITECTURE BY THE EDGE

DESIGN INTERVENTION

"Water plays a fundamental role in our psychology. We need constant access to water, yet avoid it, and we cannot leave it without reverence for water in all its forms."
-Christopher Alexander, 1977

Water requires life and happiness. It is its essential element, providing (physical, emotional, and sensory characteristics) to many environments. Water has the capacity to sustain life only when it is in its natural state, and in its natural state, it is essential to life. Water is essential to life in every context. Architecture has, from the beginning, engaged with water, often setting it as an aesthetic objective that leads to a better human habitat. Not only has it served as a fundamental element providing shade and shelter for centuries, but it has also provided opportunities for recreational activities in urban spaces. Waterfronts have transformed the basic-use activity hubs.

Water, of its presence, can influence the microclimate of a place, creating a comfortable zone, and it adds the capacity to attract and evoke a place at a tract level for any community.

Symbiotically, water represents a space for enjoying recreation. It has been a part of many (places) in most cultures, water is associated with life, health, and vitality.

However, water is a limited resource and extremely vital to humanity. Our ability to manage water has now become extremely essential to look at using water effectively from environmental, scientific, artistic, or creative perspectives.

Extreme events such as climate change, sea-level rise, and habitat destruction are increasingly associated with water-related disasters. Furthermore, the human population expansion has adversely affected water and the various natural habitats of organisms dependent on water.

Water is central to many people's positive health. It is predicted that future water will be the most critical issue any country. It is necessary to break our dams, open the eyes of the world, and put the issue of the water crisis under the spotlight. Participants, a diverse group of people, need to adopt more sustainable methods of living.

AWARDS:

UNDERGRADUATE STUDENTS CATEGORY

Certificates and a Prize amount as follows:

WINNING ENTRIES

1st Place - ₹ 75,000
2nd Place - ₹ 50,000
3rd Place - ₹ 30,000

Citation/Certificates awarded to 5 exemplary entries.

REGISTER FOR FREE

Eligibility of Participants:
Undergraduate: B. Arch. students
Graduate: M. Arch. students
Recently graduated: B. Arch. students

Registration date - Sept, 19th 2023
Registration closing - Oct, 18th 2023
Submission deadline - Dec, 1st 2023

Winning models will be published in ACA's COLLEGE OF ARCHITECTURE JOURNAL and ACA website for #IDC2024.

RESEARCH : PUBLICATION

AIM: To facilitate research and create a platform for exchange of knowledge

ACA annually hosts the International Design Research Conference which is open to students and faculty across the globe. The proceedings of the conference are published in the Research Journal 'Shodhaditya'. This year's conference was based on the theme – Architecture by the edge' which saw participation even from Sri Lanka and Bangladesh. Many of our faculty members had presented as well.

the new Academic Year*

PROMOTION AND EVENTS

AIM: The team has been organizing various events; on ACA campus in all shapes and sizes. The events are also displayed as college events' post on social media and thus act as connecting medium to connect students and staff up-to-date.

PADMAVIBHUSHAN AR CHARLES CORREA MEMORIAL LECTURE was held on 01st September 2023 –

It has been 8 years, and it is a tradition to remember Padma Vibhushan Ar. Charles Correa for his immense contribution to architecture and humane development to humanity. This year we invited **emeritus Prof. Akhtar Chauhan** to present the 7th Padma Vibhushan Charles Correa Memorial lecture for his numerous association with the maestro. The Event also saw the awards being given to the students of the third and final year who had done well in Architectural Design.

TEACHER'S DAY LIFE SKILLS TRAINING

TEACHERS DAY was held on **5th September 2024** - The event witnessed **Perna Khandelwal & Pallavi Shirgaonkar** who gave an insightful experience of Yoga thorough the art of living way and Life skills training exercise for releasing stress.

This was followed by wonderful performances managed by the Students Council and performed by enthusiastic students to honour the service of the Teachers & respect them.

WOMENS DAY was celebrated on 9th March 2024.

The AGI event celebrated innovation and women empowerment at the 11th Innovation & E-Summit. Keynote speaker was by P. Sreevathsa on "Innovation in the Entrepreneurial Ecosystem" and there were inspiring words from **Squadron Leader Kriti Bhatnagar**.

The event also saw all the AGI women staff being celebrated on the occasion with token of love and respect.

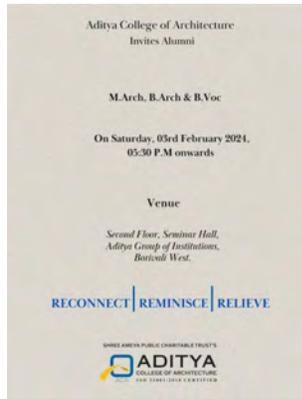

ALUMNI

AIM: To collaborate with the Alumni and invite them to take various sessions with the present batch in which they have developed expertise. The Alumni meet was conducted to further strengthen the bond.

ALUMNI MEET was held on 03rd February 2024 –

To mark the 10 year; i.e a decade of Architectural Excellence; the Alumni Meet was conducted to unite the Alumni physically and virtually, reconnecting with faculty, reminiscing on cherished memories, and envisioning future endeavors together.

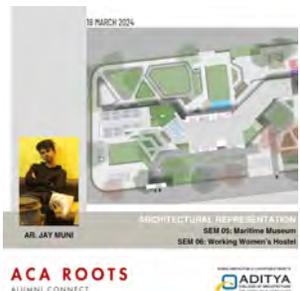

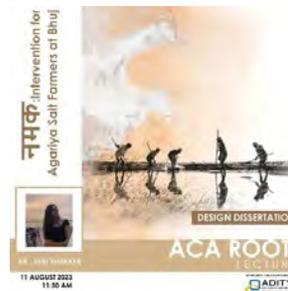

The alumni connected virtually as well and relived the fun moments and shared their experiences in postgraduate and thereafter their field experiences. The event ended with all smiles and new memories taken ahead.

ACA ROOTS.

Since its formulation; Alumni have been invited from the various batches to showcase their work and share their experiences of design and representation for the Semester 6, portfolio making relevant for the Semester 7 and explaining the process of research of their respective topics for Semester 9.

The work is well received by the students who also connect with their peers and get their queries resolved.

EXAM COMMITTEE REPORT

Topic : Annual Report of Exam committee working

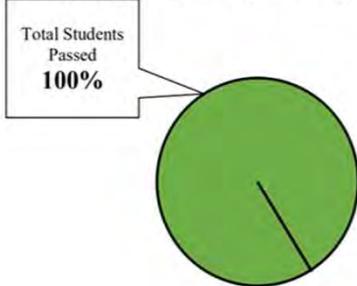

AIM : To run the examination related process smoothly and in line with the University deadlines. Exam related Process includes Form Filling, Smooth Conduct of Exams and Co-ordination and consolidation of the Assessment Output.

RESEARCH GRANT IN COLLABORATION WITH RPG FOUNDATION

Understanding & Documenting the Housing Typology of Parsi Baugs & Colonies in Mumbai and MMR

AIM: To understand & document the history and architecture of the various housing typologies that co-exist in the Parsi Baugs & Colonies based on the parameters that we have identified.

'Mapping the lesser known' is an extension of the RPG Foundation's efforts to revive and promote Mumbai's diverse cultural heritage. The program encourages students to map the tangible and intangible aspects of Mumbai.

Based on the requirements of the Research Program, a group of second year students of ACA have floated a proposal titled **'Understanding & Documenting the Housing Typology of Parsi Baugs & Colonies in Mumbai and MMR'**

In Mumbai (previously known as Bombay), one of the key features of the Parsi community is the existence of Residential Baugs or Colonies, which are primarily owned, controlled, and administered by the Bombay Parsi Panchayat including flats, chawls, and bungalows

PREESHA SHARMA
2nd Year
Aditya College of architecture

SAURABH PARKAR
2nd Year
Aditya College of architecture

RANJITH NAYAK
2nd Year
Aditya College of architecture

Parsis have long been an integral component of the MMR and Mumbai with important contributions made to the development of Mumbai, MMR, and India.

We intend to document them and classify them based on several parameters including their history, location, architectural style, socio-cultural makeup, and any other distinctive features that make them unique.

The idea of the IDC was always for global networking and collaboration. We have had unflinching participation from Universities in Sri Lanka and Bangladesh. We now look forward to collaborating with University of Moratuwa, Srilanka and BRAC university, Bangladesh

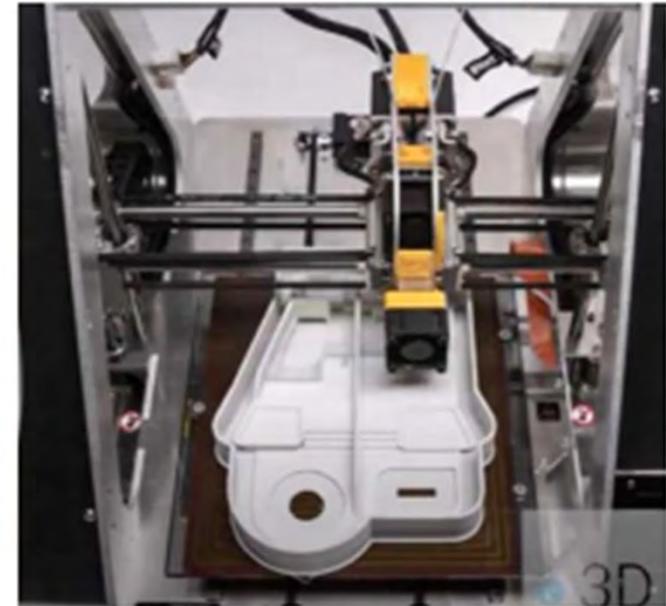

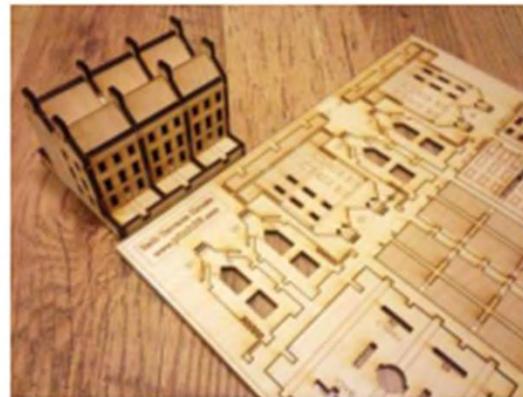

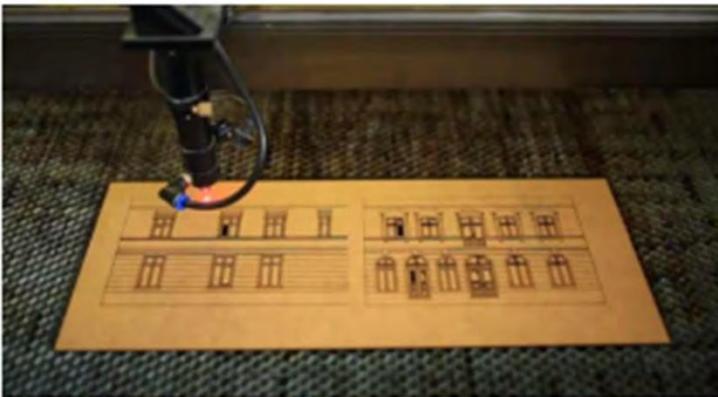

Our collaboration with Ar. Martina Spies and her NGO Anushakti provides us hope that we can tie up with Donau University in Krems, Austria for participatory workshops along the Austrian Poland border. Lastly at the national level we are in talks with Provost Ar Percy Engineer and Principal Bhavna Vimawala for a semester based collaboration with SCET University, Surat.

Further at the local level the understanding is to create awareness in all junior colleges in North Mumbai to project Aditya COA and its allied disciplines as Centre of Excellence in fields of Art and its allied courses. Faculty to visit and make presentations and invite students in batches to the campus to create a sense of awareness as well as aspirations.

SOME OF THE EQUIPMENT SUGGESTED AND ESTIMATED FOR IN THE BUDGET FOR A STATE OF THE ART LAB

1. 3D PRINTER
2. LASER CUTTER/ CNC ROUTER
3. TOTAL STATION/ THEODOLITE
4. LIDAR SCANNER/ PHOTOGRAMMETRY
5. AUGMENTED/ VIRTUAL REALITY SETUP

THE WAY FORWARD: STATE OF THE ART LAB
